

CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO. Document

Fu She Yuan [2024] No. 54

Notice on Revising the "Measures for Domestic Project Business Management of CCECC Fuzhou Survey & Design Institute Co."

To all company departments and affiliated units:

The "Measures for Domestic Project Business Management of CCECC Fuzhou Survey & Design Institute Co." were reviewed and approved at the 8th General Manager's Office Meeting of the company in 2024. They are hereby issued for implementation, and compliance is required.

CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.
December 5, 2024

Measures for Domestic Project Business Management of CCECC Fuzhou Survey & Design Institute Co.

Chapter 1 General Provisions

Article 1 In accordance with the guiding opinions on high-quality business operations of the joint-stock company, and considering the relevant requirements of the Group Company's "Implementation Rules for High-Quality Business Operations (Trial)" (Zhong Tu Jing Ying 2024 No. 341), these Measures are formulated to comprehensively improve project business quality, effectively manage the company's domestic business operations, and standardize business procedures and workflows.

Article 2 The projects referred to in these Measures are those undertaken through direct commission or bidding, including consulting, survey, design, supervision, EPC, and other types of company business operations.

Article 3 Business undertaking work shall, in principle, follow the procedure of first conducting project evaluation, then applying for approval, and finally signing the contract. Article 4 When carrying out project business undertaking work, factors such as the company's development strategy, business direction, responsibility cost, production and technical capabilities, and current status shall be comprehensively considered.

According to the process regulations of these Measures, the following stages shall be completed: information tracking, project evaluation and application, bid document preparation and review, contract negotiation, contract review and signing, owner service during project implementation, and project follow-up.

Chapter 2 Related Responsibilities

Article 5 The Business Development Department is the management department for the company's domestic project business operations, responsible for the layout and expansion of the institute's business market.

Article 6 The relevant personnel involved in project business operations and their main responsibilities are shown in Table 1 as follows:

Table 1 Main Responsibilities of Personnel Participating in Business Undertaking Work

Personnel	Key Responsibilities
Business Development Personnel	1. Maintenance of markets in each region and sector; 2. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 3. Completion of project evaluation forms, initiation and completion of the application and approval process for business development projects; 4. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 5. Contract negotiation and signing.
Head of Production Department	1. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 2. Completion of project evaluation forms, initiation and completion of the approval process for business development projects; 3. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 4. Contract negotiation and signing.
Head of Business Development Department	Lead the undertaking of large and medium-sized domestic projects (including bidding projects), guide and assist business development personnel in their work, participate in the review of various processes during the project undertaking, and submit to leadership for instructions as required (including undertaking applications, contract amount calculations, contract negotiations, contract reviews, etc.).
Relevant Professional Offices/Divisions	Complete the preparation of relevant technical materials during the project undertaking process based on business development needs.
Relevant Functional Departments	Participate in contract reviews and assist in providing relevant materials for business development needs.
Professional Supervising Chief Engineer	Responsible for the verification, quality control, and technical support of relevant technical materials during the project undertaking process based on business development needs.
Leadership Assisting with Business Development	Lead the undertaking of large and medium-sized domestic projects, guide and assist business development personnel in their work, participate in the approval of relevant processes during the project undertaking, and coordinate regional and sectoral business development efforts.
Leadership in Charge of Business Development	Formulate company business strategies based on market and industry conditions, coordinate overall domestic business development and the undertaking of large and medium-sized projects, and ensure the achievement of various business indicators.
Supervising Leadership	Organize the formulation of company business policies, business objectives, and annual business plans, comprehensively grasp the direction of company business development, preside over the undertaking of large projects, and supervise and assess the achievement of company business objectives.

Chapter 3 Project Evaluation and Undertaking

Article 7 Information Tracking: Business personnel or relevant departments obtain project information, fill out the Project Evaluation and Application Form (format see Attachment I), and initiate the project undertaking evaluation application process, bidding application process, and compliance review process through the information system.
