Measures for the Management of Domestic Project Operations of CCECC Fuzhou Survey & Design Institute Co.

Chapter 1 General Provisions

Article 1 In accordance with the guiding opinions on high-quality operations of the joint-stock company, and combined with the relevant requirements of the Group Company's "Implementation Rules for High-Quality Operations (Trial)" (CCECC Operations 2024 No. 341), these Measures are formulated to comprehensively improve project operation quality, effectively manage the company's domestic operations, and standardize operational procedures and workflows.

Article 2 The projects referred to in these Measures are those undertaken through direct commission or bidding, including consulting, survey, design, supervision, EPC, and other business operations of the company. Article 3 Operational undertaking work shall, in principle, follow the procedure of first conducting project evaluation,

Article 3 then applying for approval, and finally signing the contract. Article 4 When carrying out project operational undertaking work, factors such as the company's development strategy,

Article 4 business direction, responsibility cost, production and technical capabilities, and current status shall be comprehensively considered. According to the process provisions of these Measures, complete the work stages including "information tracking, project evaluation and application, bid document preparation and review, contract negotiation, contract review and signing, owner service during project implementation, and project follow-up."

Chapter 2 Relevant Responsibilities

Article 5 The Business Development Department is the management department for the company's domestic project operations, responsible for the layout and development of the institute's operational market.

Article 6 The relevant personnel involved in project operations and their main responsibilities are shown in Table 1 as follows:

表 1 经营承揽工作参与人员主要职责

Personnel	Key Responsibilities
Business Development Personnel	1. Maintenance of markets in various regions and sectors; 2. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 3. Completion of project evaluation forms, initiation and completion of the application and approval process for business development projects; 4. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 5. Contract negotiation and signing.
Head of Production Department	1. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 2. Completion of project evaluation forms, initiation and completion of the approval process for business development projects; 3. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 4. Contract negotiation and signing.
Head of Business Development Department	Lead the undertaking of large and medium-sized domestic projects (including bidding projects), guide and assist business development personnel in their work, participate in the review of various processes during the project undertaking, and submit to leadership for instructions as required (including undertaking applications, contract amount calculations, contract negotiations, contract reviews, etc.).
Relevant Professional Offices/Divisions	Complete the preparation of relevant technical materials during the project undertaking process based on business development needs.
Relevant Functional Departments	Participate in contract reviews and assist in providing relevant materials required for business development.
Chief Engineer in Charge of Specialty	Responsible for reviewing and checking relevant technical materials and providing technical support during the project undertaking process based on business development needs.
Leadership Supervising Business Development	Lead the undertaking of large and medium-sized domestic projects, guide and assist business development personnel in their work, participate in the approval of relevant processes during the project undertaking, and coordinate regional and sectoral business development work.
Executive Leadership in Charge of Business Development	Formulate company business strategies based on market and industry conditions, oversee overall domestic market business development and the undertaking of large and medium-sized projects, and ensure the achievement of various business development targets.
Supervising Leader	Organize the formulation of company business policies, business objectives, and annual business plans, comprehensively grasp the direction of company business development, preside over the undertaking of large projects, and supervise and assess the achievement of company business objectives.

Chapter 3 Project Evaluation and Undertaking

Article 7 Information Tracking: Operational personnel or relevant departments obtain project information, fill out the Project Evaluation and Application Form (format see Attachment I), and initiate the project undertaking evaluation application process, bidding application process, and compliance review process through the information system.
