Fusheyuan [2024] No. 54

Notice on Revising the "Measures for Domestic Project Management of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO."

To all departments and affiliated units of the Company:

The "Measures for Domestic Project Management of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO." have been reviewed and approved at the 8th General Manager's Office Meeting of the Company in 2024, and are hereby issued for implementation. Please comply accordingly.

CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

December 5, 2024

Management Measures for Domestic Project Operations of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

Chapter 1 General Provisions

Article 1 In accordance with the Guiding Opinions on High-Quality Operations of the Joint-Stock Company, and taking into account the relevant requirements of the Implementation Rules for High-Quality Operations (Trial) of the Group Company (Zhongtu Jingying [2024] No. 341), these Measures are hereby formulated to comprehensively improve project operational quality, effectively manage the company's domestic operations, and standardize operational procedures and workflows.

Article 2 The projects referred to in these Measures include various types of company business operations such as consulting, surveying, design, supervision, and general contracting for engineering projects undertaken through direct commission or bidding.

Article 3 In principle, the process for undertaking business shall follow the sequence of project evaluation first, application for approval second, and contract signing last.

Article 4 When carrying out project business development and undertaking work, factors such as the company's development strategy, business direction, responsibility cost, production and technical capabilities, and current status shall be comprehensively considered. According to the procedural requirements of these Measures, the following stages shall be completed: information tracking, project evaluation and application, bid document preparation and review, contract negotiation, contract review and signing, owner services during the project implementation phase, and project follow-up visits.

Chapter 2 Relevant Responsibilities

Article 5 The Business Development Department is the management department for the company's domestic project business operations and is responsible for the layout and expansion of the institute's business market.

Article 6 The relevant personnel involved in project operation work and their main responsibilities are shown in Table 1:

Table 1 Main Responsibilities of Personnel Participating in Business Acquisition Work

Personnel	Main Responsibilities
Business Development Personnel	1. Maintenance of markets in various regions and sectors; 2. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 3. Filling out project evaluation forms, initiating and completing the application and approval process for business development projects; 4. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 5. Contract negotiation and signing.
Head of Production Department	1. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 2. Filling out project evaluation forms, initiating and completing the approval process for business development projects; 3. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 4. Contract negotiation and signing.
Head of Business Development Department	Lead the undertaking of large and medium-sized domestic projects (including bidding projects), guide and assist business development personnel in their work, participate in the review of various processes during the project undertaking, and submit to leadership for instructions as required (including undertaking applications, contract amount calculations, contract negotiations, contract reviews, etc.).
Relevant Specialized Divisions	Complete the preparation of relevant technical materials during the project undertaking process according to the needs of project business development.
Relevant Functional Departments	Participate in contract review and assist in providing relevant materials for business operations requirements.
Chief Engineer in Charge of the Discipline	Based on project business needs, responsible for reviewing and controlling relevant technical data and providing technical support during the project acquisition process.
Assisting Leader for Business Operations	Lead domestic medium and large-scale project acquisitions, guide and assist business personnel in carrying out work, participate in the approval of relevant processes during the acquisition process, and coordinate regional and sectoral business operations.
Leader in Charge of Business Operations	Formulate company business strategies based on market industry conditions, oversee overall domestic market operations and medium and large-scale project acquisitions, and ensure the completion of various business indicators.
Leader in Overall Charge	Organize the formulation of company business policies, business objectives, and annual business plans, comprehensively grasp the direction of company business development, preside over large-scale project acquisitions, and supervise and assess the achievement of company business objectives.

Chapter 3 Project Evaluation and Acquisition

Article 7 Information Tracking

Business personnel or relevant departments shall obtain project information, fill out the Project Evaluation and Application Form (format see Attachment I), and initiate the project acquisition evaluation application process, bidding application process, and compliance review process through the information system.
