Notice on Revising the "Measures for Domestic Project Management of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO."

To all departments and affiliated units of the company:

The "Measures for Domestic Project Management of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO." has been reviewed and approved at the 8th General Manager's Office Meeting of the Company in 2024, and is hereby issued for implementation. Please comply accordingly.

CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

December 5, 2024

Domestic Project Business Management Measures of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

Chapter 1 General Provisions

Article 1 In accordance with the Guiding Opinions on High-Quality Business Operations of the Joint-Stock Company, and taking into account the relevant requirements of the Implementation Rules for High-Quality Business Operations (Trial) of the Group Company (Zhongtu Jingying [2024] No. 341), these Measures are formulated to comprehensively improve project business quality, effectively manage the company's domestic business operations, and standardize business procedures and workflows.

Article 2 The projects referred to in these Measures include various types of company business operations such as consulting, surveying, design, supervision, and general engineering contracting, which are undertaken through direct commission or bidding.

Article 3 In principle, the business undertaking process shall follow the sequence of project evaluation first, then application for approval, and finally contract signing.

Article 4 When carrying out project business development and undertaking work, factors such as the company's development strategy, business direction, responsibility cost, production and technical capabilities, and current status shall be comprehensively considered. According to the procedural requirements of these Measures, the following stages shall be completed: "information tracking, project evaluation and application, bid document preparation and review, contract negotiation, contract review and signing, owner services during the project implementation phase, and project follow-up visits."

Chapter 2 Relevant Responsibilities

Article 5 The Business Development Department is the management department for the company's domestic project business operations, responsible for the layout and expansion of the institute-wide business market.

Article 6 The relevant personnel involved in project operation work and their main responsibilities are shown in Table 1:

Table 1 Main Responsibilities of Personnel Participating in Business Undertaking Work

Personnel	Key Responsibilities
Business Development Personnel	1. Maintenance of markets in various regions and sectors; 2. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 3. Completion of project evaluation forms, initiation and completion of the application and approval process for business development projects; 4. Preparation and submission of relevant documents during the project undertaking process (such as bid documents, entrustment letters, quotations, etc.); 5. Contract negotiation and signing.
Head of Production Department	1. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 2. Completion of project evaluation forms, initiation and completion of the approval process for business development projects; 3. Preparation and submission of relevant documents during the project undertaking process (such as bid documents, entrustment letters, quotations, etc.); 4. Contract negotiation and signing.
Head of Business Development Department	Lead the undertaking of large and medium-sized domestic projects (including bidding projects), guide and assist business development personnel in carrying out their work, participate in the review of each process during the project undertaking, and submit to leadership for instructions as required (including undertaking applications, contract amount calculations, contract negotiations, contract reviews, etc.).
Relevant Specialized Divisions	Complete the preparation of relevant technical documents during the project undertaking process according to the needs of project business development.
Relevant Functional Departments	Participate in contract review and assist in providing relevant materials for business requirements.
Chief Engineer in Charge of the Discipline	Based on project business needs, responsible for reviewing and controlling relevant technical documents and providing technical support during the bidding process.
Assisting Leader for Business Operations	Lead domestic medium and large project bidding, guide and assist business personnel in carrying out work, participate in approval processes related to bidding, and coordinate regional and sectoral business operations.
Leader in Charge of Business Operations	Formulate company business strategies based on market industry conditions, oversee overall domestic market operations and medium and large project bidding, and ensure the completion of various business indicators.
Leader in Overall Charge	Organize the formulation of company business policies, business objectives, and annual business plans, comprehensively grasp the direction of company business development, preside over large project bidding, and supervise and assess the completion of company business objectives.

Chapter 3 Project Evaluation and Undertaking

Article 7 Information Tracking

Business personnel or relevant departments shall obtain project information, fill out the Project Evaluation and Application Form (format see Annex I), and initiate the project undertaking evaluation application process, bidding application process, and compliance review process through the information system.
