Notice on Revising the "Measures for Domestic Project Management of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO."

To all departments and affiliated units of the company:

The "Measures for Domestic Project Management of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO." was reviewed and approved at the 8th General Manager's Office Meeting in 2024, and is hereby issued for implementation. Please comply accordingly.

CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

December 5, 2024

Domestic Project Business Management Measures of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

Chapter 1 General Provisions

Article 1 In accordance with the Guiding Opinions on High-Quality Business Operations of the Joint-Stock Company, and in conjunction with the relevant requirements of the Implementation Rules for High-Quality Business Operations (Trial) of the Group Company (Zhongtu Jingying [2024] No. 341), these Measures are formulated to comprehensively improve project business quality, effectively manage the company's domestic business operations, and standardize business procedures and workflows.

Article 2 The projects referred to in these Measures include various types of company business operations such as consulting, surveying, design, supervision, and engineering procurement construction (EPC) contracted through direct commission or bidding.

Article 3 In principle, business development work shall follow the procedure of first conducting project evaluation, then applying for approval, and finally signing the contract.

Article 4 When carrying out project business development work, factors such as the company's development strategy, business direction, responsibility cost, production and technical capabilities, and current status shall be comprehensively considered. According to the process regulations of these Measures, the following stages shall be completed: information tracking, project evaluation and application, bid document preparation and review, contract negotiation, contract review and signing, owner service during project implementation, and project follow-up.

Chapter 2 Relevant Responsibilities

Article 5 The Business Development Department is the management department for the company's domestic project business development work, responsible for the layout and expansion of the institute-wide business market.

Article 6 The relevant personnel involved in project operation work and their main responsibilities are shown in Table 1:

Table 1 Main Responsibilities of Personnel Participating in Business Undertaking Work

Personnel	Main Responsibilities
Business Development Personnel	1. Maintenance of regional and sector markets; 2. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 3. Completion of project evaluation forms, initiation and completion of the application and approval process for business development projects; 4. Preparation and submission of relevant materials (such as bid documents, commissions, quotations, etc.) during the project undertaking process; 5. Contract negotiation and signing.
Head of Production Department	1. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 2. Completion of project evaluation forms, initiation and completion of the approval process for business development projects; 3. Preparation and submission of relevant materials (such as bid documents, commissions, quotations, etc.) during the project undertaking process; 4. Contract negotiation and signing.
Head of Business Development Department	Lead the undertaking of large and medium-sized domestic projects (including bidding projects), guide and assist business development personnel in their work, participate in the review of various processes during the project undertaking, and submit to leadership for instructions as required (including undertaking applications, contract amount calculations, contract negotiations, contract reviews, etc.).
Relevant Specialized Divisions	Complete the preparation of relevant technical materials during the project undertaking process according to the needs of project business development.
Relevant Functional Departments	Participate in contract reviews and assist in providing relevant materials for business requirements.
Chief Engineer in Charge of the Discipline	Based on project business needs, responsible for reviewing and controlling relevant technical documents and providing technical support during the project acquisition process.
Assisting Leader for Business Operations	Lead the acquisition of large and medium-sized domestic projects, guide and assist business personnel in carrying out their work, participate in the approval of relevant processes during the acquisition process, and coordinate regional and sectoral business operations.
Leader in Charge of Business Operations	Formulate company business strategies based on market and industry conditions, oversee overall domestic market business operations and the acquisition of large and medium-sized projects, and ensure the achievement of various business indicators.
Leader in Overall Charge	Organize the formulation of company business policies, business objectives, and annual business plans, comprehensively grasp the direction of company business development, preside over the acquisition of large projects, and supervise and assess the achievement of company business objectives.

Chapter 3 Project Evaluation and Undertaking

Article 7 Information Tracking

Business personnel or relevant departments shall obtain project information, fill out the Project Evaluation and Application Form (format see Annex I), and initiate the project undertaking evaluation application process, bidding application process, and compliance review process through the information system.
