To all departments and affiliated units of the Company:

The "Management Measures for Domestic Projects of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO." was reviewed and approved at the 8th General Manager's Office Meeting of the Company in 2024, and is hereby issued for implementation. Please comply accordingly.

CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

December 5, 2024

Management Measures for Domestic Project Operations of CCECC FUZHOU SURVEY & DESIGN INSTITUTE CO.

Chapter 1 General Provisions

Article 1 In accordance with the Guiding Opinions on High-Quality Operations of the Joint-Stock Company, and in combination with the relevant requirements of the Implementation Rules for High-Quality Operations (Trial) of the Group Company (Zhongtu Jingying [2024] No. 341), these Measures are formulated to comprehensively improve project operation quality, effectively manage the company's domestic operations, and standardize operating procedures and workflows.

Article 2 The projects referred to in these Measures include various types of company business operations such as consulting, surveying, design, supervision, and general contracting for engineering projects undertaken through direct commission or bidding.

Article 3 In principle, the business undertaking process shall follow the sequence of project evaluation first, then application for approval, and finally contract signing.

Article 4 When carrying out project business undertaking work, factors such as the company's development strategy, business direction, responsibility cost, production and technical capabilities, and current status shall be comprehensively considered. According to the process regulations of these Measures, the following stages shall be completed: information tracking, project evaluation and application, bid document preparation and review, contract negotiation, contract review and signing, owner service during the project implementation phase, and project follow-up visits.

Chapter 2 Relevant Responsibilities

Article 5 The Business Development Department is the management department for the company's domestic project business operations, responsible for the layout and development of the institute-wide business market.

Article 6 The relevant personnel involved in project operation work and their main responsibilities are shown in Table 1:

Table 1 Main Responsibilities of Personnel Participating in Business Contracting Work

Personnel	Key Responsibilities
Business Development Personnel	1. Maintenance of markets in various regions and sectors; 2. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 3. Completion of project evaluation forms, initiation and completion of the application and approval process for business development projects; 4. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 5. Contract negotiation and signing.
Head of Production Department	1. Acquisition and tracking of project information, preliminary assessment of the feasibility and necessity of undertaking projects; 2. Completion of project evaluation forms, initiation and completion of the approval process for business development projects; 3. Preparation and submission of relevant materials during the project undertaking process (such as tender documents, commissions, quotations, etc.); 4. Contract negotiation and signing.
Head of Business Development Department	Lead the undertaking of large and medium-sized domestic projects (including bidding projects), guide and assist business development personnel in their work, participate in the review of various processes during the undertaking process, and submit to leadership for instructions as required (including undertaking applications, contract amount calculations, contract negotiations, contract reviews, etc.).
Relevant Specialized Divisions	Complete the preparation of relevant technical materials during the project undertaking process according to the needs of project business development.
Relevant Functional Departments	Participate in contract review and assist in providing relevant materials for business requirements.
Chief Engineer in Charge of the Discipline	Responsible for reviewing, controlling, and providing technical support for relevant technical data during the project acquisition process, based on project business needs.
Assisting Leader for Business Operations	Lead the acquisition of domestic medium and large projects, guide and assist business personnel in their work, participate in the approval of relevant processes during acquisition, and coordinate regional and sectoral business operations.
Leader in Charge of Business Operations	Formulate company business strategies based on market and industry conditions, oversee overall domestic business operations and the acquisition of medium and large projects, and ensure the achievement of various business indicators.
Leader in Overall Charge	Organize the formulation of company business policies, objectives, and annual plans, comprehensively grasp the direction of company development, preside over the acquisition of large projects, and supervise and assess the achievement of company business objectives.

Chapter 3 Project Evaluation and Contracting

Article 7 Information Tracking

Business personnel or relevant departments shall obtain project information, fill out the Project Evaluation and Application Form (format see Annex I), and initiate the project contracting evaluation application process, bidding application process, and compliance review process through the information system.
